Code Data

AWS A5.20 E71T-12MJ H8

ASME SFA-5.20 E71T-12MJ H8

Outstanding Features

- Meets AWS A5.20 E71T-12MJ. Excellent impact value at low temperature down to -40°F can be obtained.
- Produces weld metal with less than 0.5%Ni. This Ni composition allows this wire to conform to the A-1 composition in QW-440, section IX in the ASME standard.
- Excellent weldability not only in horizontal but also in vertical and overhead welding position with 75-80%Ar - Bal.CO2.
- All position welding can be achieved with good bead appearance, negligible spatter, and easy slag removal.
